# < INTRODUCTION >

**MOTIVATION** is the leading cause behind students' failure or success in completing schoolwork. Motivation influences students' attitudes, study habits, academic readiness, and so on."

SOURCE - Higher Learning Commission, 2014 Collection of Papers, conclusion of 2011 study of students opinions for success and failure

We consider **technology**, more than as a final objective, **as a tool** to achieve a creative goal. This is the foundation of **TOKY**.

## < PRODUCT : TOKYMAKER >

- An intuitive hardware and software ecosystem to easily learn electronics, programming and creative problem solving. Games, wearables, pet care, security, robots, farming and many more projects. Unleash the inventor in you!
- Create your own code using the simple graphical programming interface with just one finger and send it to the TOKYMAKER without installing any software or connecting cables. Understand the principles of electronics, connecting our large variety of sensors and actuators in the most intuitive way. TOKYMAKER is a microcomputer compatible with the arduino analogic sensors. Finish your project in a blink of an eye and share it with the entire community so they can enjoy the prototype you invented

## < VALUE PROPOSITION >

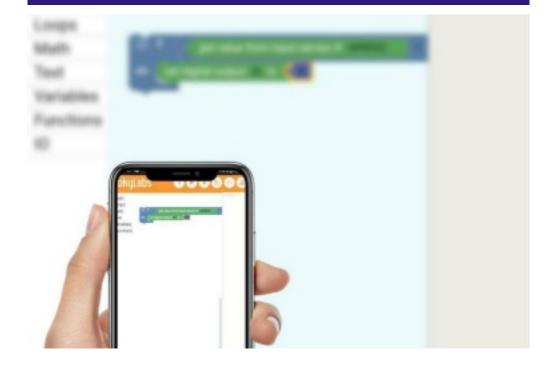

TOKY adds value to the STEAM disciplines learning process (Science, Technology, Engineery, Art and Maths) for Middle School and Junior High School Students.

By training the 21st Century skills and easily building something gorgeous, their motivation and self-confidence is boosted up with tremendous results.

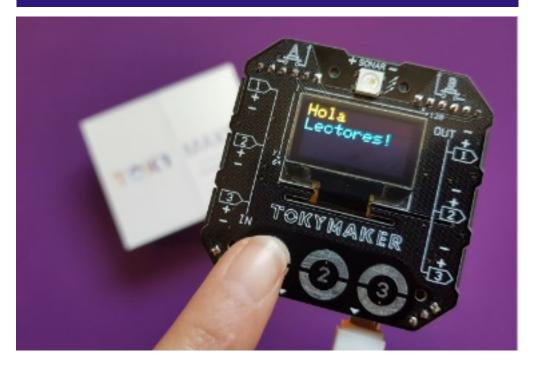

## LEARNING PROCESS>

#### **ONLINE**

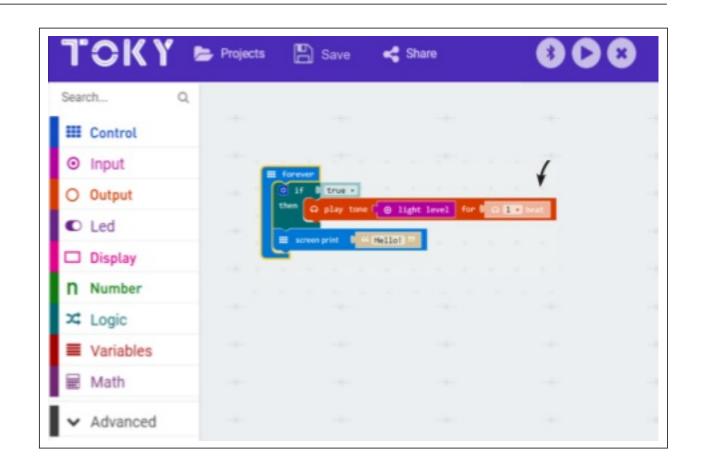

#### **OFFLINE**

## < LEARNING PROCESS >

## **ONLINE**

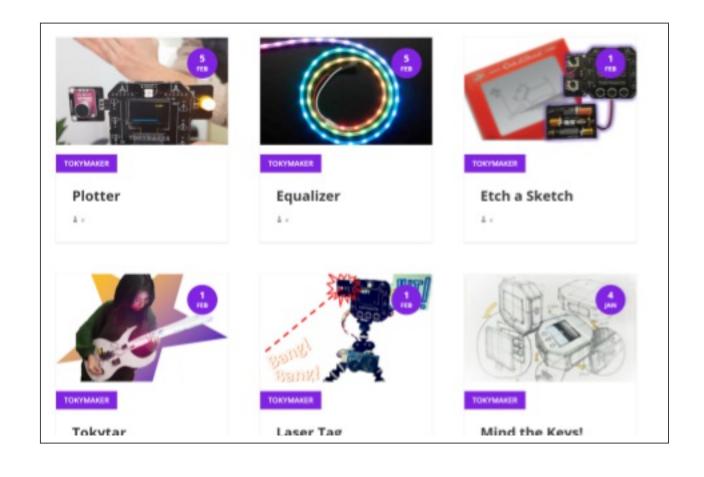

- Learn to code your own prototypes using the simple web based visual coding interface and just one finger and program it without installing software or connecting cables.
- We are using the newest Web Bluetooth technology for the smoothest experience.

## LEARNING PROCESS >

### **ONLINE**

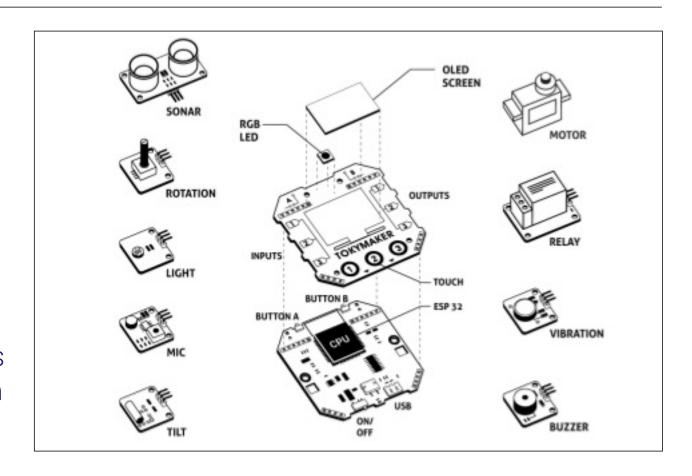

- One Word: Community. It plays an important roles on the development of the student, personally and professionally.
- Finish your project in a blink of an eye and share it with the everyone so they can enjoy the prototype you invented!

## < LEARNING PROCESS >

#### **OFFLINE**

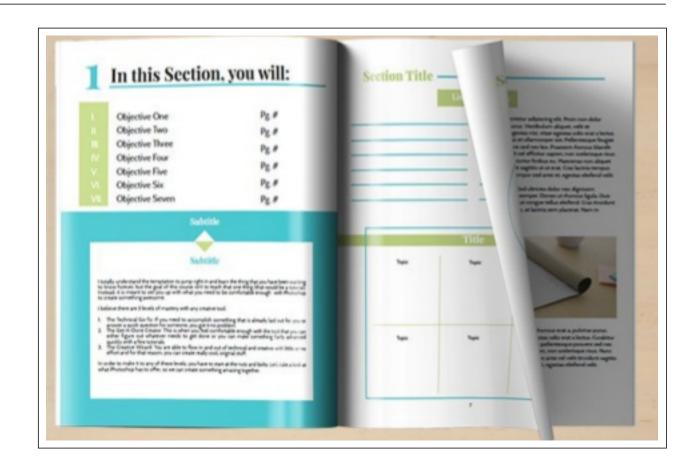

- Students can apply their ideas and knowledge into offline practices and have an holistic assimilation of the International Education Standards.
- Our Learning system allows to develop not only electronics and project management skills but also cooperation and team work, among others.

## LEARNING PROCESS >

#### OFFLINE

- At TOKY, we give quality content both for educator and student in order to achieve a meaningful experience with Learning and Technology.
- Find our tutorials and workbook in our website, following this link

## < CURRICULUM >

**TOKYMAKER**'s educational system is in line with this curriculum, among others:

- **CSTA**
- ISTE Standards (formerly NETS)
- NGSS Science and Engineering Practices
- Common Core Mathematical Practices
- Common Core Language Arts Standards
- Common Core Math Standards
